Door Station - Ports and protocols

Port	Protocol	Network	Remark
80	TCP	LAN	For access via LAN
71	TCP	WAN (Outgoing connection)	For access via Internet
73	TCP	WAN (Outgoing connection)	For access via Internet
123	UDP	WAN (Outgoing connection)	For time sync (NTP)
5353	UDP	LAN	Bonjour

For access via Internet: No port forwarding or DynDNS required for the door station. The door station establishes a secure encrypted direct and permanent connection to the Internet. Landline Broadband Internet connection (without Proxy- / Sockserver), e.g. DSL 2000 or faster required. Flat rate (data plan) recommended.

Mobile device - Ports and protocols

Port	Protocol	Network	Remark
80	TCP	LAN	For access via LAN
80	TCP	WAN (Outgoing connection)	For access via Internet
443	TCP	WAN (Outgoing connection)	For access via Internet
5352	UDP	LAN	Bonjour
6999	UDP	WAN (Outgoing connection)	For access via Internet
